

TT2 Quick Set Up Guide

You can tune your TV in manually or automatically.

**Tip* Put a cassette in your video and turn your sky or cable box to sky news. This will help when trying to set up your channel numbers.*

Automatic tuning

- 1) Press the **MENU** button twice. The **setup** menu will appear on the screen.
- 2) Select **autoprogram** by pressing the **PR DOWN** button on your remote control.
- 3) Press the middle **OK** button and your set will start to search and store all available channels. While this is happening 'Autoprogram Working' will flash on screen.
- 4) After this process has completed the setup menu will disappear and the first stored program will appear on the screen.
- 5) Refer to the **fine tuning** section within the instruction book on page 8 if the station(s) requires fine tuning.

To exit this mode press **MENU** on your remote control.

Manual Tuning

- 1) Press the **MENU** button twice. The **setup** menu will appear on the screen.
- 2) Select the **search** option by pressing the **PR DOWN** button on your remote control.
- 3) Start to search by using the **VOLUME** buttons on your remote.
- 4) The searching will stop once a program has been found. If the channel displayed is not the one required, or is of poor quality, continue to search using the **VOLUME** keys on your remote.
- 5) If you want to store this program, select the program number row by pressing the **PR DOWN** button.
- 6) Enter the desired station number by using the ten numbered keys on your remote or you can use the **VOLUME** keys to cycle through the channel numbers one at a time.
- 7) Select **store** using the **PR DOWN** button. Press the **OK** button to confirm and stored will appear on the screen.
- 8) The program will be stored in the position set in step 7.
- 9) Go back to step 2 and repeat for all the channels that are available to you.

Refer to the **fine tuning** section within the instruction book on page 8 if the station(s) requires fine tuning.
